EVENT NAME: ISCOT’- application of BIM- Latest trends in Civil Engineering

EVENT DATE: 25.09.2019

RESOUCE PERSON: Mr. Anil Ghaste, Technical Director, Inamati Building, U. B Hill, Dharwad-580007, Karnataka.

BRIEF REPORT: Building information modeling (BIM) is a process supported by various tools, technologies and contracts involving the generation and management of digital representations of physical and functional characteristics of places. Building information models (BIMs) are computer files (often but not always in proprietary formats and containing proprietary data) which can be extracted, exchanged or networked to support decision-making regarding a built asset. BIM software is used by individuals, businesses and government agencies who plan, design, construct, operate and maintain buildings and diverse physical infrastructures, such as water, refuse, electricity, gas, communication utilities, roads, railways, bridges, ports and tunnels.
