SYLLABUS

6.	Syllabus of Fifth Semester BE:							
	a. CIV51	Concrete Technology	7					
	b. CIV52	b. CIV52 Design of RC Structural elements						
	c. CIV53	Highway Engineering	15					
	d. CIV54	Analysis of Indeterminate Structures	20					
	e. CIV55	Basics of Geotechnical Engineering	25					
	Profess	ional Elective I						
	1. CIV	561 Advanced Surveying	31					
	2. CIV	562 Pavement Materials and Construction	34					
	3. CIV563 Construction Management and Engg Economics							
	4. CIV564 Rock Mechanics							
	5. CIV	565 Mechanization in Construction	46					
	6. CIV	566 Retrofitting and Rehabilitation of Structures	50					
	Profess	ional Elective I						
	1. CIV	571 Traffic Engineering	54					
	2. CIV	572 Alternative Building Materials	58					
	3. CIV	573 Open Channel Hydraulics	61					
	4. CIV	574 Hydrology and Irrigation Engg	65					
	5. CIV	575 Construction Quality and Safety	69					
	6. CIV	576 Prefabricated Structures	72					

7. Syllabus of Sixth Semester BE:

a.	CIV61 Environ	77	
b.	CIV62 Design a	82	
c.	CIV63 Design of	of Pre Stressed Concrete Structure	86
d.	CIV64 Applied	90	
e.	Elective-III		
	1. CIV651	Theory of Elasticity	97
	2. CIV652	Ground Improvement Techniques	100
	3.CIV653	Advance Concrete Technology	104
	4. CIV654	Water Resources Engineering	108
	5. CIV655	Urban Transport Planning	111
	6. CIV656	Structural Dynamics	115

f.	Open elective – I		
	1. NHOP01	Big Data Analytics using HP Vertica-1	119
	2. NHOP02	VM Ware virtualization Essentials – 1	123
	3. NHOP03	Adobe Experience manager – 1	127
	4. NHOP04	Big Data Analytics using HP Vertica – 2	133
	5. NHOP05	VM Ware virtualization Essentials – 2	137
	6. NHOP06	Adobe Experience manager – 2	141
	7. NHOP07	SAP	144
	8. NHOP08	Schneider – Industry Automation	147
	9. NHOP09	Cisco – Routing and Switching – 1	150
	10. NHOP10	Data Analytics	154
g.	Mini project (Extens	ive Survey)	94

Appendix A	Outcome Based Education	157
Appendix B	Graduate Parameters as defined by National Board of Accreditation	158
Appendix C	Bloom's Taxonomy	159

VISION

To contribute to society by imparting quality education encompassing Technical, Managerial and Entrepreneurial skills

MISSION

1. To create an environment wherein Faculty and Students engage in cutting edge research.

2. To undertake Collaborative projects in order to develop a partnership between Institute and Industry

3. To motivate Entrepreneurship and to imbibe Professional Ethics

4. To promote participation in activities which help in holistic development of students

PEO1	Graduates will be able to conceptualize, analyze, design and propose feasible solutions to civil Engineering problems by applying basic principles of mathematics, science and engineering.						
PEO2	Graduates will be inculcated with necessary professional skills and ethics, effective communication skills and holistic personality traits in becoming efficient and effective engineers.						
PEO3	Graduates will be able to work as a team in intra and interdisciplinary endeavors for the development of new ideas and products for the betterment of the society.						
PEO4	Graduates will be able to face challenges of the world economic order by incorporating expertise involving modern tools and techniques in the field of infrastructural development.						
PEO5	Graduates will acquire a high level of competence to achieve excellence and outstanding leadership to succeed as engineering professionals, innovators and entrepreneurs.						
PEO6	Graduates will also be able to pursue career paths in teaching or research.						

Program Education objectives (PEOs)

Mission Statements	PEO1	PEO2	PEO3	PEO4	PEO5	PEO6		
To create an environment wherein Faculty and Students engage in cutting edge research.	3	3	3	2	2	1		
To undertake Collaborativeprojects in order to develop a partnership between Institute and Industry	3	2	3	3	3	3		
To motivate Entrepreneurship and to imbibe Professional Ethics	3	3	2	2	3	1		
To promote participation in activities which help in holistic development of students.	1	1	2	3	3	3

Program Outcomes (PO) with Graduate Attributes

	Graduate Attributes	Program Outcomes (POs)
1	Engineering Knowledge	PO1: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2	Problem analysis	PO2 :Identity, formulate, research literature and analyze complex engineering problems reaching substantiated conclusion using first principles of mathematics and engineering sciences.
3	Design and Development of Solutions	PO3: The ability to make analysis and design study of the complexities of the various elements.
4	Investigation of Problem	PO4: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
5	Modern Tool usage	PO5 :Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6	Engineer and society	PO6: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7	Environment and sustainability	PO7: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of need for sustainable development.
8	Ethics	PO8 :Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9	Individual & team work	PO9: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10	Communication	PO10: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11	Lifelong learning	PO11: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
12	Project management and finance	PO12: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Mapping of POs TO PEOs

FIFTH SEMESTER SYLLABUS

CONCRETE TECHNOLOGY

Course Code : CIV51

L: P: T: S : 3:2:0:0

Exam Hours : 3+3 Hours

Credits : 05 CIE Marks : 50+25 SEE Marks : 50+25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand basic properties of various ingredients concrete.
CO2	Understand the properties of fresh concrete.
CO3	Understand the behavior of hardened concrete.
CO4	Design different types of concrete.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12
CO1	3	2	3	2	1	2	2	-	-	-	-	-

Module	Contents of Module	Hrs	Cos
No			
	A. CONCRETE INGREDIENTS Cement: Chemical composition, Hydration of cement, Types of cement, manufacture of Ordinary Portland Cement by wet and dry process (flow charts only) Testing of cement. Fine aggregate: Grading analysis, Specific gravity, Bulking, Moisture content, Deleterious materials. Water: Qualities of water, Use of sea water for mixing concrete.	09	

	B. CONCRETE INGREDIENTS (cont'd)		
	Coarse aggregate: Importance of size, shape and texture. Grading of		
	aggregates - Sieve analysis, Specific gravity, Flakiness Index and		
	Elongation Index, Crushing, Impact and Abrasion tests.		
	Admixtures: Chemical admixtures -plasticizers, accelerators,		
	retarders and air entraining agents. Minerals admixtures - fly ash,		CO1
	GGBS, silica fumes and rice husk ash.		
	List of experiments:		
	Cement: Normal consistency, Setting time, Soundness by Autoclave		
	method, Compression strength test, Air permeability test for		
	fineness and Specific gravity of cement.		
	Aggregates: 1. Tests on Fine aggregates – Moisture content, Specific		
	gravity, Bulk density, Sieve analysis and Bulking		
	2. Tests on Coarse aggregate - Absorption, Moisture content,		
	Specific gravity, Bulk density, Sieve analysis, Shape tests (Flakiness		
	Index, Elongation Index, Angularity number)		
	Admixture: Marsh cone test.		
	A.FRESH CONCRETE		
	Workability: Factors affecting Workability, Measurement of		
	workability – Slump test, Flow tests, Compaction factor and Vee-Bee		
	Consistometer tests, Segregation and Bleeding.		
	B.FRESH CONCRETE (cont'd)	09	
2	Process of manufacturing of concrete: Batching, Mixing,		CO 2
	Transporting, Placing, Compaction, Curing. Concept of RMC,		
	methods of curing.		
	List of experiments:		
	Workability – Slump Test, Compaction factor and Vee Bee tests.		
	A. HARDENED CONCRETE		
	Properties: Factors affecting strength, w/c ratio, gel/space ratio,		
	maturity concept, relation between compressive strength and		
	tensile strength, bond strength, modulus of rupture, Testing of		
3	hardened concrete.		
	B. HARDENED CONCRETE (cont'd)	09	
	Properties: Relation between modulus of elasticity and Strength,	55	CO3
	factors affecting modulus of elasticity, Poisson , Ratio, Shrinkage -		
	plastic shrinkage and drying shrinkage, Factors affecting shrinkage,		
1	Creep - Measurement of creep, factors affecting creep, effect of	1	

	creep		
	List of experiments:		
	Compression strength and Split Tensile Tests, Flexural strength of		
	beams.		
	A.DURABILITY OF CONCRETE		
4	Durability: Definition, significance, permeability, Sulphate attack, Chloride attack, carbonation, freezing and thawing, Factors contributing to cracks in concrete - plastic shrinkage, settlement cracks, construction joints. B. DURABILITY OF CONCRETE (cont'd)	09	
	Factors contributing to cracks in concrete: Physical, chemical &		CO3
	biological factors.		
	Non-destructive testing of concrete – Schmid's hammer, UPV,		
	pullout test,	1	
	List of Experiments:		
	Ultrasonic pulse velocity test.		
	Rebound hammer test.		
	A.MIX DESIGN		
	Concept of Concrete Mix design, Factors affecting mix design,		
	exposure conditions, Procedure of mix design as per IS 10262-2009,		
	Numerical examples of Mix Design.		
5	B.SPECIAL CONCRETES	09	
-	Properties and applications of fibre reinforced concrete, self		CO4
	compacting concrete, high performance concrete.		
	List of experiments:		
	Self-compacting concrete: Slump flow test, V-funnel test, I-box test,		
	U-box test, fill box test.

DESIGN OF RC STRUCTURAL ELEMENTS

Course Code: CIV52	Credits	3
L: P: T: S : 3:0:0:0	CIE Marks	50
Exam Hours: 03	SEE Marks	:50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand philosophy of different methods of RCC design.
CO2	Design of flanged & rectangular sections for flexure, shear & torsion.
CO3	Apply the limit state concepts in analysis and design of columns & footings
CO4	Apply the limit state concepts in analysis and design of staircases.

Module	Cor	Contents of Module							
No									
1	А. В.	 Introduction: Objectives of structural Design, Structural systems, Mutual relationship between Structural Analysis and Design. Basic Design concepts – working stress method, load factor method – limit state method, partial safety factors, stress-strain characteristics for concrete and steel importance of different limit states 	8	C01					

2	 A. Ultimate Strength of Reinforced Concrete Sections : Introduction to stress block parameters for limit state of collapse and limit state of serviceability. Ultimate flexural strength of Singly and doubly reinforced rectangular sections B. Serviceability Limit States : Deflection and cracking – code provision, deflection control in design. Limit state design of beams – Design of rectangular sections - singly and doubly reinforced, design for shear and development length. 	10	C01
3	 A. Limit State Design of Beams : Ultimate flexural design of flanged & rectangular sections. Torsion shear stress – reinforcement for torsion, calculation of short and long term deflection in beams. B. Limit State Design of Slabs : Limit state design of one way and two way slabs for various boundary conditions. 	10	CO2
4	 A. Limit State Design of Columns : Limit state design of axially loaded short R.C. column. Design of columns with uniaxial bending - using SP16. B. Limit State Design of Footings: Design of isolated square & rectangular footing for axial load and uni-axial moment 	9	СО3
5	 A. Design of Staircase: Design of staircase with waist slab/ folded plate dog legged & open well B. Detailing of RC elements – beams, slab, columns, footing & staircase. 	8	CO4

ANALYSIS OF INDETERMINATE SRUTURES

Course Code : CIV54	Credits	04
L:P:T:S : 2:1:1:0	CIE Marks	: 50+25
Exam Hours : 3+3 Hours	SEE Marks	: 50+25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the concept of classical and matrix methods of analysis
CO2	Analyse continuous beams& frames using classical methods
CO3	Analyse continuous beamsusing matrix methods
CO4	Understand the basic concepts of structural dynamics & finite element method

Mapping of Course Outcomes to Program Outcomes:

Module	Content of Module	Hrs	COs
No			
	A. Slope deflection method: Introduction, Sign convention, Development of slope-deflection equations and Analysis of Beams and Orthogonal Rigid jointed plane frames (non- sway) with kinematic redundancy less than/equal to three. (Members to be axially rigid)	09	CO1
1	 B. Analysis of rigid jointed plane framessway, members assumed to be axially rigid and kinematic redundancy up to 3 by slope deflection method. <u>List of Experiments:</u> Modeling & analysis of different types of beams using software 		
2	 A. Moment Distribution Method: Introduction, Definition of terms- Distribution factor, Carry over factor, Analysis of Beams and Orthogonal Rigid jointed plane frames (non-sway) with kinematic redundancy less than/equal to three. (Members to be axially rigid) B. Analysis of rigid jointed plane frames (sway, members assumed to be axially rigid and kinematic redundancy up to 3) by moment distribution method List of Experiments: Modeling & analysis of portal frames using software 	09	C01
3	 A. Kanis Methods: Introduction, Basic Concept, Analysis of Continuous beams and single bay two storey portal frame with and without sway. B. Clapeyron's theorem of three moments – Up to three span continuous beams with & without sinking of supports. List of Experiments: Modeling & analysis of 2D frames using software. 	09	CO2
4	A.Flexibility Matrix Method: Introduction, Development of flexibility matrix for beams and axially rigid plane framed		

	structural elements		
	B. Stiffness Matrix Method: Introduction, Development of stiffness matrix for beams and axially rigid plane framed	09	CO3
	structural elements.		
	List of Experiments: Modeling of the multi storied building using software.		
	A. Basic Principles of Dynamics: Basic principles of Vibrations and causes, periodic and aperiodic motion, harmonic and non-harmonic motion. Period and frequency. Forced and Free Vibration, Damping and Equations of Single Degree of Freedom System with and without damping		
5	 B. Introduction to Finite Element Method: type of finite elements, Displacement functions, Beam element, Truss element, Plane Stress, Plane Strain, Modeling Concepts.(Without numerical problems) <u>List of Experiments:</u> Analysis of the multi storied building using software. 	09	CO4

BASICS OF GEOTECHNICAL ENGINEERING

Course Code: CIV55	Credits: 5
L: P: T: S : 3:2:0:0	CIE Marks: 50+25
Exam Hours: 03 + 03	SEE Marks: 50+25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the nature of Soil, its functional relationships and index properties
CO2	Study of classification of soil and clay mineralogy
CO3	Learn Engineering properties of Soil such as permeability and shear strength of soil
CO4	Understand compaction and compressibility of soil and their determination

Mapping of Course Outcomes to Program Outcomes:

Module No	Content of Module	Hrs	Cos
1	INTRODUCTION TO SOIL MECHANICS: A. Nature of Soil and Functional relationships: Definition of Soil Mechanics, Origin and formation of soil. Phase Diagrams, Voids ratio, Porosity, Percentage Air Voids, Air content, Degree of saturation, Water content, Specific Gravity of soil solids and soil mass, Densities and Unit weights - Bulk, Dry, Saturated, Submerged and their inter relationships. Relative density.	09	CO1

	B. Determination of Index properties of soil: Determination of Water content (Oven drying method), Specific gravity (Pycnometer and Density bottle method). Determination of field density (Core cutter method and Sand replacement method). Particle size distribution (Dry Sieve analysis), Particle size distribution Curve. Consistency limits - Liquid Limit (Casagrande's method), Plastic limit and Shrinkage limit and indices Activity, Sensitivity and Thixotropy of Clay.				
	 List of experiments: Tests for determination of Specific gravity (for coarse and fine grained soils) Consistency Limits – Liquid Limit (Casagrande's Method), plastic limit and shrinkage limit. Determination of In situ density by core cutter and sand replacement methods. 				
2	 CLASSIFICATION OF SOIL AND CLAY MINEROLOGY A. Classification and identification of soils: Need for soil classification, Field identification of soils, IS classification (theory) - Plasticity chart. B. Soil Structure and Clay Mineralogy: Single grained, honey-combed, flocculent and dispersed structures, primary and secondary bonds, Diffused double layer, adsorbed water, Baseexchange capacity, Isomorphous substitution. Common clay minerals in soil and their structures- Kaolinite, Illite and Montmorillonite. 				
	List of experiments: 1. Field identification of fine grained soils 2. Grain size analysis of soil sample (sieve analysis).				
3	PERMEABILITY AND COMPACTION A. Flow of Water through Soils: Darcy's law- assumptions, validity and limitations, discharge velocity, seepage velocity, percolation, Coefficient of permeability and its determination (Laboratory methods), Factors affecting permeability, Permeability of	09	соз		

	stratified deposits. B. Compaction of soil : Definition, Standard and Modified proctor's compaction tests, Factors affecting compaction, Effect of compaction on soil properties, Field compaction control - Proctor's needle method. Field compaction equipments and their suitability.		
	<u>List of experiments:</u> 1. Standard Proctor Compaction Test and Modified Proctor Compaction Test. 2. Coefficient of permeability by constant head and variable head methods		
4	 COMPRESSIBILITY AND CONSOLIDATION OF SOIL A. Consolidation of Soils: Definition, difference between compaction and consolidation, Mass-spring analogy, Terzaghi's one dimensional consolidation theory - assumptions and limitations (no derivation). Consolidation characteristics of soil (cc, av, mv and cv). Normally consolidated, under consolidated and over consolidated soils. Pre-consolidation pressure and its determination. B. Laboratory determination of consolidation test results, e – log p curve. Determination of consolidation characteristics of soils - compression index and coefficient of consolidation by square root of time fitting method and logarithmic time fitting method. 	09	CO3
	List of experiments: 1. Consolidation test – determination of compression index and coefficient of consolidation(Demonstration only)		

5	 EFFECTIVE STRESS AND SHEAR STRENGTH OF SOIL A. Effective Stress Principle: Definition and importance of effective stress. Effective Stress in soil mass under different hydrostatic conditions. Quick sand condition (Boiling of sand), critical hydraulic gradient. B. Shear strength: Shear strength parameters - Mohr Coulomb strength theory. Determination of shear strength parameters using triaxial shear tests under three drainage conditions namely UU, CU & CD tests, direct shear test, unconfined compressive strength and vane shear tests. 	09	CO4
	 List of experiments: Determination of shear Strength parameters - Triaxial test, Direct Shear Test, Unconfined Compression Test, Laboratory vane shear test. Demonstration of miscellaneous equipments such as Augers, Samplers, Rapid Moisture meter. Demonstration of Hydrometer Test. Demonstration of Free Swell Index Demonstration of determination of relative density of sands. Preparing a consolidated report of index properties and three engineering properties namely permeability, compressibility and shear strength of soils.

	A. INTRODUCTION:		
	Definition, Scope and Importance, Historical development of Rock		
	Mechanics. Stratigraphy of India – Archean Rocks, Cuddapah Rocks,		
	Vindhyan Rocks, Paleozoic Rocks, Mesozoic rocks, Gondwana Rocks,		
1	Deccan Traps.	09	CO1
	B. STEREOGRAPHIC REPRESENTATION OF GEOLOGICAL DATA		
	Introduction, Principle of equal area net, plotting a line and plane,		
	construction of pi diagram, uses and limitation of pi diagram.		

	A. LABORATORY TESTS FORPHYSICO - MECHANICAL PROPERTIES OF ROCKS		
	Tests for Physico-mechanical properties: Compressive strength, Tensile		
	strength, Direct shear, Triaxial Shear, Slake durability Schmidt Rebound		
	Hardness, Sound Velocity, Swelling pressures and free swell, Void Index,		
	Thermal conductivity		
2			
	B. FIELD TESTS ON ROCKS AND ROCK MASS		CO2
	Geophysical methods: Seismic Refraction method, Electrical Resistivity		
	method, Deformability tests- Plate Loading Test (PLT), Plate Jack Test,	09	
	Goodman Jack Test (GJT), Field shear test - Field PermeabilityTest - Open	09	
	end Test, Packers Test. In situ stress measurement by Hydrofracture,		
	Overcoring and Flat Jack methods.		
	A. STRENGTH, MODULUS AND STRESS STRAIN BEHAVIOUR OF		
	ROCKS		
	Factors influencing rock behavior, Strength criteria for Isotropic Intact		
3	Rocks, Modulus of Isotropic Intact Rocks, Uniaxial Compressive	09	
5	Strength of Intact Anisotropic Rocks, Compressive strength and	05	
	modulus from SPT, Stress Strain models – Elastic model, Elasto-plastic		
	model, Visco elastic, Elasto-viscoelastic model.		
			CO3
	B. ENGINEERING CLASSIFICATION OF ROCK AND ROCK MASSES	<u> </u>	
	RQD, RMR system, Terzaghi's rock load classification, Deere Miller, CMRS		
	and RSR System. Classification based on strength and modulus,		
	Clasification based on strength and failure strain, rock discontinuity		
		1	1

	Clasification based on strength and failure strain, rock discontinuity		
	qualitative description, friction in rocks – Amonton's law of		
	friction.Application of rock mass classification in rock engineering.		
	A. ROCK SLOPE STABILITY:		
	Modes of failure – Rotational, Plane and wedge failures, Plane failure		
	analysis, Wedgefailure Analysis and Toppling failure analysis, Protection		
4	against slope failure.	09	CO4
	B. FAILURE CRITERIA FOR ROCK AND ROCK MASSES:		
	Mohr-Coulomb Yield Criterion, Drucker-Prager Criterion, Hoek-Brown		
	Criterion, Tensile Yield Criterion.		

	A. EXCAVATIONS AND METHODS TO IMPROVE STRUCTURAL DEFECTS IN ROCK MASSES Drilling, Blasting and underground open excavation, criteria for design of underground excavations, tubular excavations, pillars and ribs support		
5	multiple excavations. Structural defects in Rock masses, their improvement by rock bolting, grouting and other methods. Shotcrete and rock support interaction analysis	09	CO4
	B. ROCK FOUNDATION Estimation of Bearing Capacity – Intact, Fractured rocks, Stress distribution in rocks, Factor of Safety, Sliding stability of dam foundation, Settlement in rocks, Bearing capacity of piles in rock, Measures for strengthening rock mass – Concrete shear keys, Bored concrete piles, Tensioned cable anchors, concrete block at toe.

HYDROLOGY AND IRRIGATION ENGINEERING

Course Code : CIV574	Credits	03
L: P: T: S : 2:0:0:1	CIE Marks	50
Exam Hours : 3 Hours	SEE Marks	50

Course Outcomes: At the end of the Course, the student will be able to:

Understand various components of hydrologic cycle, its measurement and
estimation.
Get acquainted with the concepts of hydrographs, floods and its computation.
Understand and analyze different methods of irrigation, water requirement of
crops, frequency and efficiencies of irrigation.
Analyze the concept of canal alignment & design.

Module	Content of Module	Hrs	COs
No			
1	 A. Introduction to Hydrology: Introduction, Hydrologic cycle - Horton's representation, Water budget equation, <i>Precipitation:</i> Forms, Types, Measurement using Simon's gauge & Syphon gauge. B. Computation of Rainfall: Selection of rain gauge station, Adequacy of rain gauges, Methods of computing average rainfall, Interpolation of missing rainfall data, Double mass curve method, Hyetograph and mass curve of rainfall. 	09	CO1
2	 A. Evaporation: Definition, Factors affecting evaporation, Measurement using ISI standard pan, Estimation using Meyer's and Rohwer's equation, Methods to reduce evaporation losses. B. Evapotranspiration: Definition, Factors affecting evapotranspitation, Measurement using Lysimeter and field plots, Estimation by Blaney criddle method. <i>Infiltration:</i> Definition, Factors affecting infiltration, Measurement using double ring infiltrometer, Infiltration indices, Horton's equation of infiltration. 	09	CO1
3	 A. Hydrographs: Definition, Components of hydrographs, Base flow separation, Unit hydrograph - its derivation from simple storm hydrograph, numerical problems, Limitations and uses. B. Estimation of flood: Definition of flood, factors affecting flood, Estimation of floods by using envelope curves, empirical formulae and rational method. 	09	CO2
4	 A. Introduction to irrigation Introduction, Need for irrigation, Advantages and disadvantages of irrigation, Types of irrigation system, Methods of irrigation. B. Soil-water-crop relationship: Introduction, Soil profile, Physical properties of soil, Functions of irrigation soils, Maintaining soil fertility, Soil-water-plant relationship and soil moisture - irrigation relationship, Frequency of irrigation. 	09	CO3
5	A. Water Requirement of Crops: Crop seasons of India, Definition of Base period, Crop period, Delta and Duty,	09	

Factors affecting duty, Methods to improving duty of	
water, Consumptive use, Assessment of irrigation water,	CO3
Irrigation efficiencies.	&
	CO4
B. Canals: Definition, Types of canals, Alignment of canals,	
Design of canals by Kennedy's and Lacey's methods –	
Problems.

SIXTH SEMESTER SYLLABUS

ENVIRONMENTAL ENGINEERING 1

Course Code	: CIV61	Credits	5
L: P: T: S	: 3:2:0:0	CIE Marks	:50+25
Exam Hours	: 03+03 hours	SEE Marks	: 50+25

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Apply engineering knowledge to estimate the demand of water and analyse the quality of water.
	of water.
CO2	Design efficient treatment unit for the benefit of environment and society.
CO3	Gain knowledge about disinfection and water softening.
CO4	Develop layout of water supply in buildings and understand pipe appurtenances.

	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12

Module No	Content of Module	Hrs	COs
1	 A. Introduction: Human activities and environmental pollution. Need for protected water supply. Drinking water standards BIS & WHO guidelines (IS 10500). Objectives of water quality management. Wholesomeness & palatability, water borne diseases. Health significance of Fluoride, Nitrates and heavy metals like Mercury, Cadmium, Arsenic etc. and toxic / trace organics. 	09	CO1

	 B. Demand of Water: Types of water demands- domestic, institutional, commercial, public and fire. Per capita consumption –factors affecting per capita demand, population forecasting, different methods with merits & demerits- variations in demand of water. Fire demand – estimation by Kuichling's formula, peak factors, design periods & factors governing the design periods List of experiments Determination of Alkalinity, Acidity and pH Determination of Hardness 		
2	 A. Sources and Collection: Sources- Surface and subsurface sources – suitability with regard to quality and quantity. Intake structures – different types of intakes; factor of selection and location of intakes. B. Quality of Water: Sampling of water for examination Water quality parameters – Testing Physical- Temperature, Electrical conductivity, Turbidity, colour, odour, taste. Chemical – Total solids, Hardness, Chlorides, Chlorine, pH, Sulphates, nitrogen compounds, iron, DO, BOD, COD, sodium and potassium. Microbiological analysis. List of experiments Determination of BOD Determination of sodium and potassium by flame photometer 	09	C01
3	A. Water Treatment: Objectives – Treatment flow-chart. SEDIMENTATION: Theory, settling tanks, types, design. Coagulant aided sedimentation, jar test, chemical feeding, flash mixing, and clari- flocculator	09	

		-	
	B. Filtration: Mechanism – theory of filtration, types of filters,		CO2
	slow sand, rapid sand and pressure filters including construction, operation, cleaning and their design		
	(excluding under drainage system), back washing of filters.		
	Operational problems in filters.		
	List of experiments		
	1. Jar Test for Optimum Dosage of Alum		
	A. Disinfection: Theory of disinfection, types of disinfection,		
	Chlorination, chlorine demand, residual chlorine, use of		
	bleaching powder. UV irradiation treatment – treatment of		
	swimming pool water.		
			CO3
	B. Softening – Definition, methods of removal of hardness by		
	lime soda process and zeolite process, RO & Membrane		
	technique.		
4		09	
-	Miscellaneous Treatment-Aeration- Types of Aeration.	05	
	Adsorption technique, fluoridation and defluoridation.		
	List of experiments		
	1. Determination of residual chlorine.		
	2. Determination of percentage of available chlorine in		
	bleaching powder		
	A. Conveyance of water- Design of the economical diameter		
	for the rising main; Nomograms – use, Pipe appurtenances		
	various valves, type of fire hydrants, pipefitting, Layout o		
	water supply pipes in buildings. Plumbing in high rise		
	buildings.		
5			CO4
		09	
	B. Distribution Systems: System of supply, service reservoirs		
	and their capacity determination, methods of layout of		
	distribution systems.		
	List of experiments		
	1. Determination of Solids in Sewage		
·

DESIGN OF PRE STRESSED CONCRETE STRUCTURE

Course Code: CIV63

L: P: T: S : 3:0:0:0

Exam Hours: 03

Course outcome -

CO1	Understand the concepts of pre-stressing.
CO2	Analyze pre-stress members for external load and pre-stress.
CO3	Analyze flanged & rectangular members/sections for flexure and shear.
CO4	Design of simple flexural members.

- CIE Marks

			1
	A. MATERIALS: Materials for pre-stressed concrete, high strength concrete and high strength steel. Stress-Strain characteristics and properties, advantages of pre-stressed concrete		
1.	B .BASIC PRINCIPLES OF PRESTRESSING:. Load balancing concept, Stress concept, centre of Thrust. Pre-tensioning and post-tensioning systems, tensioning methods and end anchorages. Pre-stressing systems (1) Fressinet System (2) Gifford Udall (3) Magnel Blatan System, Tensioning devices, is anchoring devices. (d) Pretensioning and Post tensioning.	6	CO 1
2	A. ANALYSIS OF SECTIONS FOR FLEXURE: Analysis of pre-stress members, assumptions, Stresses in concrete due to pre-stress and loads, stresses in steel due to loads, Cable profiles. Thrust line concept of load balancing, cable profile, as per IS 1343 - 2012.	14	CO1
	B. LOSSES OF PRE-STRESS: Various losses encountered in pre-tensioning and post tensioning methods, determination of jacking force. Elastic shortening, loss due to shrinkage, loss due to creep, loss due to friction, loss due to curvature etc. I.S. code		
3	A.DEFLECTIONS: Effect of tendon profile on deflections – Factors influencing deflections – Calculation of Short term and long term deflections of simply supported flexural members, Elastic deflections under transfer loads and due to different cable profiles		CO2
	B.DEFLECTION LIMITS : as per IS 1343. Effect of creep on deflection, load verses deflection curve, methods of reducing deflection		

4	 A. LIMIT STATE OF COLLAPSE: Limit state design of flexural members, stress, I.S. code provisions, design of symmetrical beams, Flexure -IS Code recommendations – Ultimate flexural strength of sections. B. LIMIT STATE OF COLLAPSE : Shear - IS Code recommendations, shear resistance of sections, shear reinforcement. 	7	CO3
5	A.DESIGN OF END BLOCKS: Transmission of pre-stress in pre-tensioned members, transmission length, Anchorage stress in post-tensioned members. Bearing stress and bursting tensile force-stresses in end blocks-Methods, I.S. Code, provision for the design of end block reinforcement. B.DESIGN OF PRE-TENSIONED & POST TENSIONED BEAMS: design of simple rectangular pre & post tensioned flexural members	11	CO4

APPLIED GEOTECHNICAL ENGINEERING

Course Code: CIV64	Credits	3
L: P: T: S : 3:0:0:0	CIE Marks	50
Exam Hours: 03	SEE Mark	s 50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Evaluate suitability of a site using soil exploration techniques and ground improvement techniques.
CO2	Analyse slope stability and to determine stresses using Boussineq's and Westergaard's solution.
CO3	Determine the lateral earth pressures on earth retaining structures and bearing capacity of soils for foundations.
CO4	Analyse and compute the settlement in foundations and to design shallow foundations and pile foundations.

Module No	Content of Module	Hrs	Cos
1	 SOIL EXPLORATION AND IMPROVEMENT A. Subsurface Exploration: Importance of soil exploration, Methods of exploration: Boring (Auger, Rotary, percussion drilling), types of samples, Samplers, Sample disturbance, Area ratio, Recovery ratio, clearance, Stabilization of boreholes - Typical bore log. Number and depth of borings for various civil engineering structures, Standard penetration test and cone penetration test, geophysical methods of exploration. Preparation of Soil exploration report. B. Site improvement: Introduction, Need for ground improvement, Stabilization of soils, different types- mechanical, lime, fly ash and chemical stabilization, Vibroflotation. 		C01
2	 SOIL STRESSES AND SLOPE STABILITY A. Stresses in Soils: Boussinesq's and Westergaard's theories for different types of loadings (no derivations). Comparison of Boussinesq's and Westergaard's analysis, Newmark's chart. B. Stability of Earth Slopes: Types of slopes, Causes and Types of slope failures. Definition of Factor of safety, Stability of infinite slopes for cohesive and cohesion less soils, Stability of finite slopes by Swedish slip circle method, Taylor's stability number. 	9	CO2

3	 EARTH PRESSURE THEORIES AND BEARING CAPACITY OF SOIL A. Lateral Earth Pressure: Active and Passive earth pressures, Earth pressure at rest. Rankine's and Coulomb's Earth pressure theoriesassumptions and limitations, Graphical solutions for active and passive earth pressures - Culmann's and Rebhann's methods. B. Bearing Capacity: Definitions of bearing capacity, ultimate, 	9	СО3
	net and safe bearing capacities, and allowable bearing pressure. Terzaghi's bearing capacity equations – assumptions and limitations (no derivation), Types of shear failure, Effect of ground water table on bearing capacity. Plate load test.		
	SETTLEMENT ANALYSIS AND SHALLOW FOUNDATIONS:		
4	A. Settlement analysis: Distribution of contact pressure- estimation of immediate and consolidation settlement - causes of settlement - permissible, total and differential settlement - methods of reducing differential settlement.	9	CO4
	B. Shallow foundations: General considerations - Functions of foundation - shallow foundation - different types of shallow foundation -Selection of type of shallow foundation-steps involved.		
	RAFT FOUNDATION AND PILE FOUNDATION		
	A. Raft foundation: Bearing capacity equations, Design considerations, Floating foundations.		
5	B. Pile foundation: Necessity, Classification, Pile load capacity, group of piles, pile spacing, pile group efficiency, dynamic and static formulae, Pile load test, penetration tests.	9	CO4

THEORY OF ELASTICITY

Course Code : CIV651	Credits	:04
L: P: T: S : 3:0:0:1	CIE Marks	: 50
Exam Hours : 3 Hours	SEE Marks	: 50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Comprehend basic and combined cases of stress and strain and their mechanical
	response to simple elements.
CO2	Understand fundamental equations of elastic continuum and Airy's Stress functions.
CO3	Comprehend Plane stress & plane strain 2D problems n rectangular coordinates and polar coordinates with response of thick cylinders.
CO4	To understand basics theory of plates in tension, compression and shear.

	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	POI0	POII	PO12
CO1	2	3	3	2	-	2	2	-	2	1	-	2

CO4	3	2	2	2	2	2	2	-	1	-	2	-

Module No	Content of Module	Hrs	Cos			
1	 GROUND IMPROVEMENT A. Ground improvement: Definition, Objectives of ground improvement, Classification of ground improvement techniques, Factors to be considered in the selection of the best soil improvement technique. B. Drainage & preloading: Importance, Vertical drains, Sand drains, Electro kinetic dewatering, Preloading. 	9	CO1			
2	 COMPACTION A. Effect of compaction: Effect of grain size distribution on compaction for various soil types like lateritic soil, coarse-grained soil. Effect of compaction on engineering behavior like compressibility, swelling and shrinkage, permeability, relative density, liquefaction potential. B. Field compaction: static, dynamic, impact and vibratory type. Specification of compaction. Shallow and deep compaction, Dynamic Compaction, Vibrofloatation. 					
3	 STABILIZATION A. Cement stabilization: Definition, cement stabilization, sandwich technique, admixtures. Hydration – effect of cement stabilization on permeability, Swelling and shrinkage and strength and deformation characteristics. Criteria for cement stabilization. B. Lime and Bitumen stabilization: Lime stabilization – suitability, process, criteria for lime stabilization. Bitumen stabilization in brief. 	9	CO2			

	GROUTING AND STONE COLUMN		
	A. Grouting: Introduction, Effect of grouting. Chemicals and materials		
4	used. Types of grouting. Grouting procedure, Applications of grouting		
		9	CO3
	B. Stone column: Function, Design principles, load carrying capacity,	2	
	construction techniques, settlement of stone column.		
	SOIL REINFORCEMENT		
	A. Earth reinforcement: Concept of reinforced earth, Reinforcing		
	materials, Backfill, Construction of reinforced earth wall. Stability		
	analysis of reinforced earth retaining wall- external stability		
5	analysis, internal stability analysis(Brief mention about the		
5	methods only, application areas of reinforced earth structures	9	CO4
		5	004
	B. Geotextiles: Soil reinforcement with geotextiles, classification,		
	concepts, geotextiles as separators, filters, and drainage media,		
	damage and durability of geotextiles

L:P:T:S : 3:0:0:1	CIE Marks	50
Exam Hours : 3 Hours	SEE Marks	50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand water resource, precipitation, types and measurement.
CO2	Understand hydrologic cycle &losses.
CO3	Apply engineering knowledge for finding and analyzing reservoir capacity and surface runoff.
CO4	Understand and develop methods for flood control, storm water control & surface detention.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	POI0	POII	PO12
CO1	3	3	1	-	-	2	2	-	-	-	-	2
CO2	3	3	1	-	-	2	2	-	-	-	-	2
CO3	3	3	1	-	-	2	2	-	-	-	-	2
CO4	3	3	1	-	-	2	2	-	-	-	-	2

Correlation levels: 1-Slight (Low) 2-Moderate (Medium) 3-Substantial (High)

Module No	Content of Module	Hrs	Cos
1	A. Introduction : Introduction, The world's fresh water resources, water use in the world, water management sectors, the future of water resources, water budget Single and multipurpose projects.	09	C01
	 B. Precipitation: Formation and types, rainfall measurements – types of rain gauges, computation of average rainfall over a basin & missing rain fall data, numerical 		
2	 A. Hydrologic process: Introduction to hydrology, hydrologic cycle, hydrologic losses.Infiltration: Process affecting factors, measurement and estimation, Infiltration Indices. B. Evaporation and consumptive use: Process affecting factors, estimation and measurement techniques, Evapo transpiration 	09	CO2
3	 A. Hydrograph Analysis: Hydrograph definition, Effective Rainfall- Base Flow Separation - Direct Runoff Hydrograph, numerical B. Unit Hydrograph: definition, and limitations of applications of Unit hydrograph, derivation of Unit Hydrograph from Direct Runoff, Hydrograph, S-hydrograph, numerical 	09	CO3
4	 A. Flood control: Introduction, flood plain management, flood plain definition, Flood control alternatives: structural and non-structural measures. B. Reservoir capacity- introduction, classification, site selection, determination of live storage by mass curve method, Determination of Reservoir yield, Numerical, Reservoir sedimentation. 	09	C03&CO4

	A. Storm water control: Storm water management, storm system:		CO4
5	information needs and design criteria. Rational method design, numericals	09	
	B. Storm detention : effects of urbanization, types of surface detention, detention basin outlet work, subsurface disposal of		
	storm water

URBAN TRANSPORT PLANNING

Course Code	: CIV655	Credits	:04
L: P: T: S	: 3:0:0:1	CIE Marks	: 50
Exam Hours	: 3 Hours	SEE Marks	: 50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the scope and system approach and stages in urban transport planning.
CO2	Apply the knowledge of traffic survey and analyze the various aspects of transport planning process by various methods and numerical problems
CO3	Evaluate the assignment techniques, traffic forecasting and analyze using different models and numerical problems
CO4	Understand the difficulties in transporting planning, Planning and scheduling of Mass transit systems and features of intelligent transport systems

Mapping of Course Outcomes to Program Outcomes:

STRUCTURAL DYNAMICS

Course Code: CIV656

L: P: T: S : 3:0:0:1

Exam Hours: 03

Credits 4 CIE Marks: 50 SEE Marks: 50

Course Outcomes: At the end of the Course, the student will be able to:

CO1	Understand the concepts of Structural Dynamics
CO2	Apply direct integration and numerical techniques to structural dynamic problems
CO3	Determine the natural frequencies and normal modes of multi-degree freedom System
CO4	Determine the response of shear buildings to free and forced vibrations

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO5	PO6	PO7	PO8	PO9	POIO	POII	PO12

Big Data Analytics Using HP Vertica-1

Code : NHOP01 L:P:T:S : 3:0:0:1 Exam Hours : 3 Credits: 04 CIE Marks: 50 SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Demonstrate SQL command in Oracle and Vertica Databases
CO2	Apply the features of Vertica in running database designer.
СО3	Creation of projection, partition of table manually in Vertica
CO4	Apply Copy, Delete, Merge, Purge concepts in Vertica database.
CO5	Apply the concepts of HDFS in designing multi node clustering in Hadoop
CO6	Demonstrate Hadoop ecosystem tools like Pig, HBase.

VM ware Virtualization Essentials-1

Course Code: NHOP02 L:P:T:S: 3:0:0:1 Exam Hours: 3 Credits: 04 CIE Marks: 50 SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Understand the common terms and definitions of Operating System, Cloud Computing and Virtualization.
CO2	Learning the business benefits and considerations of VMware virtualization.
соз	Knowing various approaches to server virtualization, its relevance to the modern data center, available platforms and important features.
CO4	Analyzing the implications of virtualization on Data Center Challenges.
CO5	Enable to configure the VMware vSphere storage and network virtualization.

Adobe Experience Manager - 1

Course Code	: NHOP03	Credits: 04
L:P:T:S	: 3:0:0:1	CIE Marks: 50
Exam Hours	:3	SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

	Gain a fresh perspective on online marketing in a global scenario. Understand the concepts of object oriented programming in JAVA.
CO2	Understand the programming concepts in Web scripting languages and will be able develop web pages using scripting languages.
CO3	Understand the architecture, technologies and frameworks in Adobe Experience Manager.
CO4	Create online webpages, Digital asset management and campaigning using AEM
	Integrate new digital marketing techniques into the strategic marketing plan using AEM.
CO5	Drive change and foster innovation in Digital Marketing with AEM

Mapping of Course Outcomes to Program Outcomes:

Module	Module Contents	Hours	COs
No			
1	Introduction to DM & AEM Getting started with DM: What is online marketing? Characteristics of good domain name? What is digital marketing? Different methods of digital Marketing, Main methods of DM, Search engine optimization, pay per click & display advertising, email marketing, content marketing, social media marketing.	8	C01
	Introduction Object Oriented Programming with JAVA		
	Fundamentals: Class Objects, Methods, Constructor, this reference, inheritance, and polymorphism,Introduction to JSP		
	Hands on :	4	
	 Write a program to calculate and area of four different geometric shapes: triangles, squares, rectangles, and circles.Use Method overriding. 		
	 Employee program to create n object to find gross salary. Data: empid, empname, gender, basic, hra = 25% of basic, DA = 125% of basic, CCA=Rs 300, IT=10% if gross >1L. 		
	Display all information.		
	Use constructors		
	Implement required methods.		
	3. Student program to create n objects to find Grade.		

	Data:usn,studname,sem,sub name[],sub marks[],percentage, Grade. 90		
	- 100 = S 80 - 89 = A		
	70-79 =B		
	60 - 69 = C		
	50 – 59 = D		
	40 – 49 =E		
	< 40 = F		
2	Introduction to Scripting Languages: Web and XHTML:Internet, WWW, Web Browsers and Web Servers, URLs, HTTP, XHTML: Basic syntax, Standard structure, Basic text markup, Images, Hypertext Links, Lists, Tables, Forms, Frames CSS: Introduction,Levels of style sheets,formats,selector forms,The box model,conflict resolutionJavascript: Overview, Object orientation and Javascript, Syntactic characteristics, Primitives, operations, and expressions, Screen output and keyboard input, Control statements, Arrays, Functions, Pattern matching using regular expressions, Errors in scripts.Introduction to Sightly	9	CO2
	 Hands on: Create a web page using HTML forms for email registration. Create a web page using HTML frames. Develop a XHTML file that includes Javascript script for that accepts a number n using prompt and outputs the first n Fibonacci numbers Develop a XHTML file that includes Javascript script for that accepts a number n using prompt and outputs at ble of numbers from 1 to n and their squares using alert Develop a web page usingHTML and apply the various CSS styles. 	4	
3	Getting started with AEM: Introduction to Web content management, History of AEM, The adobe marketing cloud, Install & deploy AEM, Author Instance, Publish Instance,AEM Consoles: Authoring in AEM, work with user interfaces: Classic UI, Touch optimized UI, AEM web console: OSGi management console, CRX Explorer, CRXDE Lite AEM Architecture OSGi framework: Introduction ,AEM functional building blocks, Architecture stack, OSGi framework. Content Repository: JCR, Jackrabbit Oak, Adobe CRXWeb Framework: REST, Apache Sling.	9	CO3

	Hands on: 1. AEM installation & deployment.	4	
	 Working in AEM Environment Familiarize yourself with a Repository structure. Create a Node and add properties. 		
4	Managing Content AEM Authoring Framework — Templates, Create Templates, Components and Design , components ,Create a Page-Rendering Component ,Modularize the Page Component ,Inheriting Foundation Components , Design , Adding a design to a page ,Creating Components and Include them in Scripts, Create a Top Navigation Component, Dialog Boxes ,Create Dialog Boxes for Components, Dialog Box -Classic-UI ,touch-optimized UI ,Use Design Dialog Boxes for Global Content , Create a logo component.	9	
	 Hands On Create the Structure of Your Website 2. Create a Template for Your Website Create a Page-Rendering Component Create a Website Structure Modularize the Page Component Inherit the Sightly Foundation Component Page Add a Design to the Page Create a Top Navigation Component and Include it in a Script Create a Logo Component 	4	CO4
5	Digital Asset Management, Mobile pages, Managing Campaign : Introduction to DAM, Basic DAM functions, DAM Metadata, DAM Components, Finding Assets, Asset Management, Adding New content, Authoring Responsive& Mobile Pages, Managing Campaigns& Content Targeting.		

Hands on:			
1. Creat	te and customize asset share page		
2. Add a	a predicate to the asset share page		
3. Add a	an asset editor page	4	CO5
4. Versi	oning for assets		
5. Creat	te folders		
6. Add (CUG properties to folders		
7. Use t	ags to organize assets		
8. Edit i	mages		
9. l	Upload thumbnail		
10.View	v references to assets		
11.Edit	metadata of an asset		
12.Crea	te a Page		
13.Insei	rt a New Paragraph		
14.Edit	the next Paragraph		
15.Add	an image from the content finder		
16.Insei	rt an image from your file system		
17.Add	more Components		
18.Anno	otate a component		
19.Mov	e or delete a component		
20.Wor	king with responsive page Layout		
21.Crea	te a Mobile page		
22.Add	content to Mobile Page		
23.Crea	ting brand		
24.Crea	ting campaign		
25.Defir	ning a new segment		
26.Crea	te experiences		
27.Turn	a component into targeted component		
28.Test	the campaign

Big Data Analytics Using HP Vertica- 2

Code : NHOP04	Credits: 04
L:P:T:S : 3:0:0:1	CIE Marks: 50
Exam Hours : 3	SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Demonstrate Hadoop filesystem and mapreduce programs
CO2	Demonstrate the working of SQOOP tool
СО3	Apply Pig shell commands and operators
CO4	Creating and running Pig Latin scripts
CO5	Demonstrate HIVE commands and creating tables in HIVE
CO6	Perform handson practice on HBase commands

	VERTICA & Hadoop Review		
	Vertica Cluster Management: Adding nodes to an		
	existing cluster, Removing nodes from a cluster,		
	Replacing nodes, Node recovery in vertica, Rebalancing		
	data across nodes		
	Hands on sessions		
	Check hadoop configuration file		co1 co2
1	Load a .csv file from local file system to hadoop	9	CO1, CO2
1	file system	5	
	Perform analysis on loaded files using hadoop		
	mapreduce programs and verify the output		
	using hadoop commands as well as browser		
	 Count 		
	o Grep		
	SQOOP		
	Verifying Sqoop status through cloudera		
	manager		
	Hand-on Practice on various Sqoop basic		
	commands		
	 List-database 		
	 List-table 		
	 Eval 		
	Import of tables from Mysgl database		
	to hdfs		
	 Import of all tables 		
	 Import of specific tables to 		
	default directory /target directory		
	 Import of subset of tables using 		
	"where" clause		
	 Import table as sequence file 		
	 Incremental import 		
	Export files from hdfs to mysql database		
	Apache Pig Architecture: - Apache Pig components, Pig		
	Latin Data Model: atom, tuple, bag, relation, map.		
2	Basic grunt shell commands, Running local mode -		
	mapreduce mode,	-	CO3
	Pig Latin 1: Pig Latin Statements: Data types- simple &	9	
	Complex Data Types		
	Hands on sessions:		
	Operators (Part 1):		
	 Loading and storing - from/to local file system, 		
	from/to hdfs		
	 Diagnostic operator – Dump, Describe, Explain, 		
	• Diagnostic operator – Dump, Describe, Explain, illustrate		
	mustidle		

3	 Filtering – filter operator; For Each Generate operator: projection, nested projection, schema; Distinct Operator Arthematic operators Comparision operator Boolean Operators Hands on Sessions: Operators (Part 2) : Grouping & Joining Operator – GROUP, CO- GROUP, JOIN(INNER, SELF JOIN) Combining & splitting – UNION, SPLIT Sorting – ORDER BY, LIMIT Pig Latin Built-in functions: Eval functions: AVG, SUM, MIN, MAX, COUNT, SIZE, CONCAT, DIFF, SUBTRACT, ISEMPTY, TOKENIZE Bag&Tuple Functions: TOTUPLE, TOBAG, TOMAP String Functions: ENDSWITS, STARTSWITH, SUBSTRING, EQUALSIGNORECASE, INDEXOF, LCFIRST(), UCFIRST(), UPPER(), LOWER(), REPLACE() Math Functions: ABS, CBRT, SQRT, COS, SIN, TAN, CEIL, FLOOR, EXP, LOG, LOG10, ROUND Apache Pig - Running Scripts: Creating pigscript Commenting pigscript with/withoutparameters Sample examples: word count program using pig script, count of similar events from a log file, simple twitter case studyexample. 	9	CO4
4	HIVE <u>Hive:</u> Why hive? , components of hive, simple architecture of hive, data-model of hive(database, table, partition, bucket) Hands on Session: <u>Hive Commands :</u> Data Definition Language (DDL) © CREATE database/ table/ external table , DROP, TRUNCATE, ALTER, SHOW, DESCRIBE Statements. © Create table with partition by, clustering by commands Data Manipulation Language (DML) © LOAD, INSERT Statements- INSERT INTO,	9	CO5

	INSERT OVERWRITE		
	Built-in Operators- Relational Operators- Arithmetic		
	Operators- Logical Operators - Complex Operators-		
	example: simple queries on these operators		
	Order by clause- Group by clause- aggregate		
	functions(sum, avg, count, min, max) Joins, Create and drop of views , index		
	HBASE : Various types of No Sql Databses – when HBASE is		
	used? - HBase Data Model (Table, Rowkey, Column families,		
	Column qualifiers, Cell, Timestamp)		
	Hands on Sessions:		
	Base shell Command: Create table with		
	/without version –		
	put command	9	CO6
	get command with / without version		
	Scan command		
	I delete column – column family		
5	I disable – enable		
5	2 drop table

VMware Virtualization Essentials -2

Course Code : NHOP05	
L:P:T:S: 3:0:0:1	
Exam Hours : 3	

Credits: 04 CIE Marks: 50 SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Learn the common terms and definitions of data center, vSphere Virtual infrastructure
CO2	Learning the vCenter Server architecture, virtual machine and importance of VMware tools
CO3	Analyzevirtual machine management, resource management and monitoring.
CO4	Learning vSphere products and solutions for protecting data
CO5	Enable to configure the VMware vSphere products and solutions

Mapping of Course Outcomes to Program Outcomes

	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12
CO1	3	2	2	2	2	-	-	-	2	1	-	2

CO3	3	3	2	2	2	-	-	-	2	1	-	2
CO4	3	3	2	2	2	-	-	-	2	1	-	2
CO5	3	3	2	2	2	-	-	-	2	1	-	2

Module No	Module Contents	Hours	COs
1	Introduction to vSphere and the Software-Defined Data Center: Describe the topology of a physical data center, Explain the vSphere virtual infrastructure, Define the files and components of virtual Machines, Describe the benefits of using virtual machines, Explain the similarities and differences between physical architectures and virtual architectures, Define the purpose of ESXi, Define the purpose ofvCenter Server, Explain the software-defined data center, Describe private, public, and hybrid clouds. List of programs: 1. Using vSphere Web Client.	8	CO1

2	vCenter Server: Introduce the vCenter Server architecture, Deploy and configure vCenter Server Appliance, Use vSphere Web ClientBackup and restore vCenter Server, Examine vCenter Server permissions and rolesExplain the vSphere HA architectures and features,Examine the new vSphere authentication proxy, Manage vCenter Server inventory objects and licenses, Access and navigate the new vSphere clients. Creating Virtual Machines: Introduce virtual machines, virtual machine hardware, and virtual machine filesIdentify the files that make up a virtual machine, Discuss the latest virtual machine hardware and its features, Describe virtual machine CPU, memory, disk, and network resource usage, Explain the importance of VMware Tools™, Discuss PCI pass-through, Direct I/O, remote direct memory access, and NVMe, Deployand configure virtual machinesand templates, Identify the virtual machine disk format. List of programs:	9	CO2
	1. Creating a Virtual Machine.		
	2. Manage vCenter Server inventory objects		
3	 Virtual Machine Management: Use templates and cloning to deploy new virtual machines, Modify and manage virtual machines, Clone a virtual machine, Upgrade virtual machine hardware to version 12, Remove virtual machines from the vCenter Server inventory and datastore, Customize a new virtual machine using customization specification files, Perform vSphere vMotion and vSphere Storage vMotion migrations, Create and manage virtual machine snapshots, Create, clone, and exportvApps, Introduce the types of content libraries and how to deploy and use them. List of programs: Create clone, templates and manage virtual machines Perform vSphere vMotion migrations. 	9	CO3
4	Resource Management and Monitoring: Introduce virtual CPU and memory concepts, Explain virtual memory reclamation techniques, Describe virtual machine over-commitment and resource competition, Configure and manage resource pools, Describe methods for optimizing, CPU and memory usage, Use various tools to monitor resource usage, Create and use alarms to report certain conditions orevents, Describe and deploy resource pools, Set reservations, limits, and shares, Describe expandable reservations, Schedule changes to resource settings, Create, clone, and export vApps, Use vCenter Server performance charts and esxtop to analyze vSphere performance.	9	CO3

	List of programs: 1. Create virtual machine snapshots	
	2. Manage resource and monitoring of virtual CPU and memory concepts	
5	 vSphere HA, vSphere Fault Tolerance, and Protecting Data: Explain the vSphere HA architecture, Configure and manage a vSphere HA cluster, Use vSphere HA advanced parameters, Define clusterwide restart ordering capabilities, Enforce infrastructural or intra-app dependenciesduring failover, Describe vSphere HA heartbeat networks and datastore heartbeats, Introduce vSphere Fault Tolerance, Enable vSphere Fault Tolerance on virtual machines, Support vSphere Fault Tolerance interoperability with vSAN, Examine enhanced consolidation of vSphere Fault Tolerance virtual machines, Introduce vSphere Replication, Use vSphere Data Protection to back up and restore data. List of programs: Perform vSphere Fault Tolerance 	CO4 CO5

Adobe Experience Manager – 2

Course Code : NHOP06 L:P:T:S: 3:0:0:1 Exam Hours : 3 Credits: 04 CIE Marks: 50 SEE Marks: 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Learn to write a server side java application called JSP to catch form data sent from client and store it on database.
CO2	Learn to develop a dynamic webpage by the use of java script and HTML5.
CO3	Demonstrate a server side java application called Servlet to catch form data sent from client, process it and store it on database and write scripts using perl
CO4	Building Web applications with PHP
CO5	Gain an understanding of search engine algorithms and how they affect organic search results and websites.

Cisco- Routing and Switching - 1

Course Code	:NHOP09	Credits	: 04
L:P:T:S	: 3:0:0:1	CIE Marks	: 50
Exam Hours	: 03	SEE Marks	50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Describe the devices and services used to support communications in data networks, Internet and Role of Protocol Network.
CO2	Design, calculate, and apply subnet masks and addresses to fulfill given requirements in IPv4 and IPv6 network
CO3	Build a simple Ethernet network using routers and switches
CO4	Describe enhanced switching technologies such as VLANs, VLAN Trunking Protocol,
CO5	Describe and analyse the operations of Dynamic Host Configuration Protocol and Domain Name
CO6	Configure and troubleshoot basic operations of a small switched network

DATA ANALYTICS

Course Code : NHOP10 L:P:T:S : 3:0:0:1 Exam Hours : 03 Credits 04 CIE Marks 50 SEE Marks 50

Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Learn various types of data warehousing and modeling techniques.
CO2	Understand the basics of various SQL commands and HP Vertica.
CO3	Demonstrate Copy, partitioning, DBD, Analytic functions in Vertica.
CO4	Understand various types of Web Analytics.
CO5	Understand various types of Marketing Analytics.

Mapping of Course Outcomes to Program Outcomes:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	2	2	2	1	-	-	2	2	3	2
CO2	3	2	2	2	2	1	-	-	2	2	3	2
CO3	3	2	2	2	2	1	-	-	2	2	3	2
CO4	3	2	2	2	2	1	-	-	2	2	3	2
CO5	3	2	2	2	2	1	-	-	2	2	3	2

SI. NO	Contents of Module	Hrs	Co's
Module-1	Data Modeling and Introduction to Data Analytics: Overview of the Data Warehouse and Data mart modeling process, Dimensional modeling, Snowflake and Star schema, Aggregate fact tables, Fact Constellation schema, The characteristics of dimension table and fact table. Fundamentals of Data analytics, Phases in Data Analytics, Types of Data Analytics, Challenges in Data Analytics	9	C01
Module-2	Introduction to basic SQL and HP Vertica: Introduction to Structured Query Language, Types of SQL, Data types, Constraints, Select, Insert, Delete and Update statements in SQL, Aggregate functions. Introduction to HP-Vertica Database, Vertica Analytics Platform, Columnar Orientation, Advanced Compression, High Availability, Automatic Database design, Massively Parallel Processing, Application Integration Hands on sessions		CO2
	 a) Creation of databases, Creation of schema, Creation of tables b) Inserting values to the table, select operations c) Delete and update operations a) Creation of tables with constrains and insertion of values into 		

	tables		
	b) Hands-on DML commands to apply different aggregate function		
Module-3	 HP Vertica-2: Projection fundamentals, Replication and Segmentation, Hybrid data store – WOS & ROS. Database Designer, Comprehensive mode, Incremental mode, COPY command, Merge and Partitioning, Basic VERTICA Analytic functions. Hands on sessions a) Hands-on projections b) Running Database designer c) Copying a file to Vertica database and verifying error logs. 	9	соз
Module-4	Web Analytics : Descriptive, Predictive and Prescriptive analytics	9	CO4
Module-5	Marketing Analytics and CASE Studies :Introduction,Market segmentation : Cluster analysis,Using classification trees for segmentation;Advertising : Pay Per Click Onlineadvertising;Internet and Social marketing : Networks,Viral marketingText miningCASE Studies :Bristol Myers Squibb,Advertising,AVIS-Budget Car Rental.	9	CO5

Text Books:

- 1. The Data Warehouse Lifecycle Toolkit Second Edition, by Ralph Kimball, Margy Ross, Warren Thornthwaite, Joy Mundy and Bob Becker, 2008.
- 2. Marketing Analytics : Data Driven Techniques with Microsoft-Excel, Wayne L. Winston, John Wiley & Sons, Inc. 2014

APPENDIX A

Outcome Based Education

Outcome-based education (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational Outcomes as defined by the National Board of Accredition:

Program Educational Objectives: The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

Program Outcomes: What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

Course Outcome: The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

Mapping of Outcomes

COURSE OUTCOME PROGGRAM OUTCOME PROGRAM EDUCATIONAL OBJECTIVES DEPARTMENTAL MISSION DEPARTMENTAL VISION

APPENDIX B

The Graduate Attributes of NBA

Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialisation to the solution of complex engineering problems.

Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Conduct investigations of complex problems: The problems that cannot be solved by straightforward application of knowledge, theories and techniques applicable to the engineering discipline that may not have a unique solution. For example, a design problem can be solved in many ways and lead to multiple possible solutions that require consideration of appropriate constraints/requirements not explicitly given in the problem statement (like: cost, power requirement, durability, product life, etc.) which need to be defined (modeled) within appropriate mathematical framework that often require use of modern computational concepts and tools.

Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Life-long learning: Recognise the need for, and have the preparation and ability to engage in independent and life long learning in the breadest context of technological change.

independent and life-long learning in the broadest context of technological change.

APPENDIX C

BLOOM'S TAXONOMY

Bloom's taxonomy is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
